

1984 Cumulative Author Index

This index lists the authors of all books and papers reviewed or abstracted in *Computing Reviews* in 1984, together with the review numbers. The latter can be used to find the issues of *CR* containing the full bibliographic citation and its review. Because of the number of multiple authors, and the abstracts in addition to the reviews, too much space would be needed to print the actual citation here. The complete author-title-review number index will eventually appear in the 1984 *ACM Guide to Computing Literature*.
